Education

GGSIU, B.Tech in Artificial Intelligence and Data Science - CGPA: 8.81/10.0

Aug 2024-July-2028

Skills

Languages: Python, C, Javascript,

Framework: Tensorflow, Scikit Learn, Matplotlib, Numpy, Spacepy, Pandas, Scipy, Seaborn, RAG, Computer Vision

Tools: PostgreSQL, Supabase, REST APIs, Neon, CSS, HTML, Postman, Git, AWS, Azure, Docker, Figma, Framer, Vercel, Netlify, Arduino,

Experience

Information Technology Lead, Alcontcitic – World Trade Center, New Delhi

Nov 2023 - May 2025

- Designed and launched two company websites, collaborating with Retrovolution for hosting and maintenance to ensure a reliable online presence.
- Applied data cleaning, manipulation, and web scraping to extract financial data, and advised leadership on IT strategy and technology investments through collaboration with industry professionals.

Co-Founder, ZOMAKARB AI SOLUTIONS, New Delhi

October 2025 - Present

- **Founded the startup to architect and scale AI platforms**, currently engineering real-time ASR and NER transcription systems using Bhashini APIs. with secure backend infrastructures for web and mobile systems, leveraging Azure tunneling to facilitate scalable, multilingual speech processing.
- Collaborated with **DIBD(Digital India Bhashini Division)**, **NCRB(National Crime Records Bureau)** and **My Bharat Portal** presenting in Bhashini Hackathons where are in the **Top 5 Finalist Positions** in two hackathons.

Projects

Mahila Bachao Chashma Lagao - IoT, Python, Swift, Supabase, Azure [▶ Watch Video](#)

- **IoT-based smart glasses** for women's safety, integrating **Video** and **Audio** recording, **location**, and **Emergency SOS** sending **real-time** upload to a **cloud database** that can be accessed by law enforcement.
- **Real-time GPS** tracking with a tamper-proof cloud pipeline to instantly record and upload irrefutable evidence. Which can be viewed on the MBCL Mobile App hosting safety features and as a front-end of the glasses.

Police FIR Management Dashboard + App - Bhashini - JavaScript, Supabase, Swift, Bhashini AI [▶ Watch Video](#)

- **Multilingual** FIR filing system featuring Voice-based FIR Creation in the **mobile app** to a secure **web dashboard** for law enforcement, leveraging **Bhashini's models** for transcription, FIR creation and multilingual support.
- **Local LLM** using Ollama's Qwen, Mxbai Embed which helps in our **RAG Pipeline** for NER, developed **APIs** for seamless data transfer (app → dashboard), deployed on **Vercel** with version control using Git.

Speak4CV App + Website - Bhashini - Bhashini API, Swift, Javascript, Google Cloud. [▶ Watch Video](#)

- **Voice-enabled, multilingual resume builder** that captures user inputs through speech and resume creation in **over 22 Indian languages**, leveraging **Bhashini's speech recognition, NER And NLP Models**
- Finetuned the Speech Recognition in Model and integrated our Local LLM which is paired with Ollama and Mxbai to build an NER Extraction and format based insertion pipeline

ONDC Onboarding Agent - India AI - Local LLM, RAG Implementation, JavaScript [▶ Watch Video](#)

- Developed a voice-first React/FastAPI platform for ONDC onboarding, utilizing regional speech-to-text to enable seamless registration for micro-enterprises.
- Engineered an Ollama and Mxbai powered partner-matching algorithm and NER pipeline to automate business data extraction from audio, optimizing merchant routing and reducing manual friction.

MSEFC ODR Platform & Nyaya AI Assistant - India AI - Local LLM, RAG Embedding, JavaScript [▶ Watch Video](#)

- Developed an ODR portal using Python/Flask and Ollama (Qwen-2.5) for secure, privacy-compliant processing of legal MSME claims.
- Built "Nyaya," an AI virtual lawyer that automates evidence extraction, calculates statutory interest, and utilizes ML to predict settlement probabilities and optimal negotiation bands..

AStra (Automated Speaking Tracker) - IoT, Javascript [Github](#)

- Engineered a 433MHz-based GPS tracking mesh to locate lost individuals in high-density crowds without internet.
- Developed a central command dashboard to visualize real-time locations and broadcast status updates.

Achievements

- Smart Delhi Ideathon 2025 - 3rd Place overall, Won Problem Statement out of 5000+ participants.
- Bhashini Startup Velocity Hackathon 2.0 - Top 5 in Problem Statement
- Bhashini Leap Hackathon - Top 5 in Problem Statement
